05 Mutterkorn	08:41
06 Telepath	05:59
07 Delysid	04:42
08 Trip	11:22
09 Awake	15:19

The multimedia show „The Sound Of LSD“ is an LSD molecular dubbing by B. Ashra. Trig Fardust created the visual part. The show was performed live at the festival „75 Years LSD Anniversary“ 2018 in Basel.

From the audio-visual live performance, this album and a 60-minute video was created. Exactly 1 year later, on 19.04.2019, the Bicycle Day, this setting is now published.

The Sound Of LSD – The Visual Version Trig Fardust (video) / B. Ashra (music)

A specially created visual performance by the video artist Trig Fardust for the anniversary. The live mixed picture journey, accompanied by the music of „The Sound Of LSD“, will be available separately on a USB stick.

A multi-layered, psychedelic video show that complements the sounds of the molecule in the visible range and is guided by the effects of LSD.

prelisten and download: **bandcamp**

The physically determined measured values of the LSD spectral analysis are octaved into the rhythm and audible tone range and thus form the basis of the entire musical composition in which all 6 main spectra of the LSD molecule can be heard.

The molecular dubbing is based on calculations by Hans Cousto (The Cosmic Octave).
