(110,61 Hz) | 103,7 bpm |
colour: yellow-orange
Chakra: brow chakra, third eye
Effect: supports higher love energy and aspiration
for harmony. Venus is the symbol of femininity.

Venus is the second inner planet of our solar system, and its rotation around the sun lasts about 225 days. In the 32nd octave, the Venus tone oscillates with 221.23 Hz, which is an A.

With a wavelength of about 615 nanometers, the corresponding colour is a bright yellow-orange. Traditionally, Venus is associated to Taurus as a morning star – and as an evening star, it belongs to Libra.

B. Ashra – Venus Meditation

1. Venus Meditation – 62:00 min.

Venus tuning: A | + 9,64 Cent | 221,23 Hz (110,61 Hz) |
103,7 bpm | colour: yellow-orange

Venus Meditation is B. Ashra's follow-up CD to the successful Om Meditation. Both CDs are very well suited for meditations, therapeutic sessions, any kind of rituals, for complete deep relaxation, or simply to enjoy.

In order to maximize the effect of the respective keynote, both compositions mostly go without large arcs of suspense. Thus, what you hear are mainly minimalist electronic soundscapes.

Meditations of 62 minutes will have an effect on the grey matter of the brain. The subconscious mind and the outer projection will be integrated.

Venus is known as the Roman goddess of love, erotic desire, and beauty. She was often depicted with a dolphin, which, in antiquity, was seen as a symbol of love and philanthropy. This is why some passages of the CE Venus Meditation contain dolphin sounds, recorded in the Atlantic near Gomera.
