## **Ambient Music meets Science**

Now after the first release of Morphon at the compilation „active agent of sound“ kw002 at the end of 2007, they presents their first Longplay: OM Mars Venus

This CD contains spherical electronic ambientmusic with a philosophic background.

With their project, Morphon, Eru (electronics and guitar), Tom Wölke aka Tommelon (electronics and guitar), and B. Ashra (electronics) are exploring artistically the mental and physical effects of natural vibrations and rhythms (for example, planetary cycles).

The Berlin label, Klangwirkstoff, offers its listeners access to the fruits of contemporary, harmonical music research and constitutes a network for tuned music which spans the micro- and macrocosm of audible possibilities.
