solar system | written by Christian Fiesel
- 09. Toshra** - Sahasrara
platonian year | written by Tom Wölke & B.Ashra

Active Agent Of Sound II:

The tunings of the keynotes of this compositions are based on resonances which are coming from nature.

For Example planettones (overtones from orbital cycles), molecular resonances (spectral analysis) or the Schumann Resonance (earth magnet field).

This should support the possibility to come into harmony with the way of things by reaching an energetic resonance with nature.

Planetary tuned music is like molecular tuned music composed in accordance with strict harmonical rules and is based on the natural laws which govern the „cosmic octave“.
